Manufacturing Technician

X-Nav Technologies, LLC - Greater Philadelphia Area

Job Description

- Build, troubleshoot, and test products and subassemblies for functionality or quality.
- Set up and operate production equipment in accordance with current good manufacturing practices and standard operating procedures.
- Assist engineers in developing, building, or testing prototypes or new products, processes, or procedures.
- Install, calibrate, and adjust equipment to ensure quality production.
- Inspect finished products for quality and adherence to customer specifications.
- Prepare production documents, such as standard operating procedures, manufacturing records, inventory reports, or productivity reports.
- Work in a team environment with the ability to interface with many different departments such as engineering, service, etc.
- Adhere to all applicable regulations, policies, and procedures for health, safety, and environmental compliance.

Qualifications:

- High School Diploma or equivalent with 2+ Years' experience in a medical device manufacturing environment.
- Minimum 2 years of experience as Manufacturing Technician is preferred.
- Must have good English written and verbal communication skills.
- Mechanical aptitude desired.
- High energy, organized, self-starter with the initiative to solve difficult problems.

Desired Skills & Experience:

- Ability to construct and test electro-mechanical devices.
- Ability to understand electrical schematics and mechanical assembly drawings.
- Proficient in the use of electronics test equipment, such as oscilloscopes, multi-meters, soldering equipment, etc.
- Proficient in Microsoft Word, Excel, Visio, and PowerPoint.
- Excellent verbal and written communication skills.
- Knowledge of the medical device industry and FDA regulations a plus.
